Dear John Doe

I am writing to express my interest in the Software developer position at ABC Company. I am a 4th year student in the Computer Software Engineering Co-op program at the University of Alberta. Starting April 26, 2019, I am available for a 4 or 8 month position.

I feel that this is an excellent opportunity to work with a progressive organization that provides quality training and hands-on experience. The recent announcement of your involvement with project abc is exciting and aligned with my future career interests.

I am always looking to learn something new. During my last job at ATB Financial, I was part of an agile team that worked on the new online banking platform for business customers. I had the pleasure of learning how to leverage several technologies, such as React, Redux, Google Cloud Platform, Docker, and Jenkins to name a few. I also had the opportunity to mentor a team of students and recent graduates to solve a business case problem. These opportunities have taught me how to work in an agile team, meet deadlines, not being afraid of failures, and having fun.

I will be available to commence employment starting April 26, 2019, but I am available for an interview immediately. I can be contacted at the e-mail address or phone number below. Thank you for taking the time to consider my application. I look forward to further discussing how I can make a positive contribution to ABC Company.

Sincerely,

Arun Woosaree
